

Business Overview

Corporate Philosophy

All officers and employees have high work ethics and professional pride. Furthermore we offer products that are highly durable, safe and secure looking at it from a customer's point of view

We contribute to the society and improve our corporate value by basing on fundamental principle of customer and employee satisfactions.

We look to the new things constantly and continue to challenge them.

Ishii Manufacturing was established in the 1961. We specialize in designing, development and manufacturing of poultry processing equipment and machines (to undertake the process of Killing, Scalding, De-feathering, Chilling, Evisceration, Cut-up). With a history and experience of over 52 years, we are an industry leader and have been providing solutions to major broiler companies in Japan.

Ishii Manufacturing has also been servicing customers in other food-processing industries, Japan Agriculture and several government institutions. We have been active not only Japan, but have exported products to several customers across Asia.

We offer a wide range of standardized stand-alone units to integrated plants and system, designed to meet our customer's needs. Our strength lies in understanding the customer's unique needs, customized designing, providing quality products and reliable services. Our Mission is service and customer satisfaction.

If you do not happen to find a suitable solution among our standard products, please do not hesitate to communicate with us.
